Education:

Western Governors University

Bachelors of Science Computer Science,

January 2023

Experience:

Dominion Energy - Cayce, SC - Software Engineer Intern

May 2021 - August 2021

- Assisted in creating a plugin for CIS that would reschedule cutting a client due to inclement weather.
- Improved workflow by creating a source code generator for Entities, reducing turnaround by 1 week.
- Solved a UI problem by coloring every grid to know what regions of the screen were taken.
- Implemented database interactions between the entity and CIS.
- Implemented the UI using XAML for the previously mentioned plugin.
- Discovered and patched UI defects after the supervisor ran out of tasks.

Technical Skills:

- Full Stack Development.
- Object-Oriented Design Patterns, Model/View/Controller.
- Optimizing Algorithm for finding prime numbers.
- Technologies: C, Java, JavaScript, HTML, CSS, Git, and MySQL.
- Computer, and printer repair and updating.

Projects:

- Bakery website for mother (designing stage).
- Toy Encryption Library (studying stage).
- Flight Booking Software.
- Personal Website: <https://jimmypinkard.herokuapp.com/>

Activities:

Eagle Scout

January 2020

- Eagle Project: Created benches at a summer camp for children with disabilities.
- Served as Troop Guide, ASPL, and other positions.
- Was asked to write a letter of recommendation for a younger scout.
